The earliest records of misbehavior date back to ancient times. In ancient Greece, for instance, children were known to engage in various forms of mischief, such as throwing rocks at animals and engaging in pranks. Ancient Egyptians also had a reputation for unruly behavior, as evidenced by the numerous complaints recorded in their legal documents.

The Middle Ages witnessed a shift in attitudes towards misbehavior. Strongly influenced by religious beliefs, medieval society viewed misbehavior as a sin against God. As a result, punishments for wrongdoing were often severe, including flogging, imprisonment, and even execution.

Renaissance: A Rise in Individualism

The Renaissance brought about a gradual decline in the belief that misbehavior was solely caused by divine intervention. Instead, a growing emphasis was placed on the individual's role in their own behavior. This shift in perspective led to a more nuanced understanding of misbehavior, as well as a decrease in the severity of punishments.
