Clark's behavior is a classic example of what psychologists call "serial friending." Serial friending is a pattern of behavior in which someone repeatedly befriends people, only to betray them later. This behavior is often motivated by a need for attention, validation, and control.

There are a number of psychological factors that may contribute to serial friending. These factors include:

- **Low self-esteem:** People with low self-esteem may serial friend in order to feel better about themselves. They may need the attention

and validation that comes from having friends.

- **Narcissism:** Narcissists are often serial frienders. They may befriend people in order to exploit them for their own gain.
- **Antisocial personality disorder:** People with antisocial personality disorder may serial friend in order to manipulate and control others.
- **Attachment disorder:** People with attachment disorders may serial friend in order to avoid getting close to others. They may be afraid of being abandoned or rejected.

Serial friending can have a devastating impact on victims. It can lead to financial loss, emotional distress, and even physical harm. If you think you are being serial friended, it is important to seek help from a mental health professional.

The Case of Michael Clark

Michael Clark was born in 1963 in San Francisco, California. He was the youngest of three children. His parents divorced when he was young, and he was raised by his mother.

Clark was a troubled child. He was often in trouble at school and was diagnosed with attention deficit hyperactivity disorder (ADHD). He also struggled with depression and anxiety.

As a teenager, Clark began to exhibit signs of serial friending. He would befriend people, only to betray them later. He would often move in with his friends, only to steal from them and disappear.

In 1985, Clark was arrested for stealing from a friend. He was sentenced to probation. However, he continued to serial friend and steal from his victims.

In 1992, Clark was arrested again for stealing from a friend. This time, he was sentenced to prison. He was released from prison in 1998.

However, Clark soon began to serial friend again. In 2003, he was arrested for stealing from a friend. He was sentenced to prison again.

Clark was released from prison in 2010. However, he soon began to serial friend again. In 2013, he was arrested for stealing from a friend. He was sentenced to prison again.

Clark is currently serving a prison sentence for stealing from a friend. He is scheduled to be released from prison in 2023.

Michael Clark is a serial friend. He has betrayed countless people over the years. His behavior is a classic example of what psychologists call "serial friending."

Serial friending is a pattern of behavior in which someone repeatedly befriends people, only to betray them later. This behavior is often motivated by a need for attention, validation, and control.

Serial friending can have a devastating impact on victims. It can lead to financial loss, emotional distress, and even physical harm. If you think you are being serial friended, it is important to seek help from a mental health professional.
